Zünd Samplemaker - Cutting, Creasing, Drawing with Tz-T-P

For many years Zünd is consistently setting new standards for reliable and multifunctional samplemakers.

Over thousand satisfied customers rely on the multifunctional Zünd cutter. For packaging sample-making of folding carton, corrugated or plastics.

T75-P tool head for die board rubbering:

The knife cutting technology is a real alternative to the waterjet system! This low priced solution offers the following advantages:

- bevel cut with angles of 0°, 7.5°, 10° or 15° degrees by using different inserts
- less production steps than with usual methods
- immediate processing, no drying!
- free profile geometry
- perfect fitting- and repeating accuracy
- marking of rubber for easy identification

Combi tool-head Tz-T75-P

The new Zünd tool head combines the advantages of the Tz-T-P and the T75-P:

The new tool head Tz-T75-P has the best price/performance ratio and is the ideal solution for sample making and rubber cutting with one machine.

In no time the rubber cutting module can be converted into a multifunctional samplemaker for cutting, creasing and drawing.
